Overall assessment

Overall Evaluation

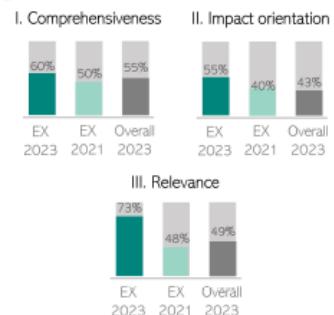

With a score of 67%, EXAMPLE is "Advancing" in the field of sustainability reporting.

Overall Evaluation

EXAMPLE achieved the following values in the three categories:

The overall rating of the sustainability reporting of COMPANY XY in 2020 amounts to **67%** thanks to congue mauris rhoncus aenean vel elit scelerisque mauris pellentesque pulvinar pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Compared to the 200 companies analysed in Focused Reporting 2023 benchmark (grey squares) and the key industry competitors (dotted grey line) COMPANY XY is in the "**Advancing**" category.

Note that the 'Industry' values presented in this analysis refer to the companies' results from the industry *Mobility, Transport & Logistics* (reporting year 2022). The 'overall' values refer to the Swiss Focused Reporting Benchmark 2023 (reporting year 2022).

Key recommendations

COMPANY XY can further improve its sustainability reporting in the following areas:

I. Comprehensiveness

- Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
- Fermentum leo vel orci porta non pulvinar neque.
- Est lorem ipsum dolor sit.

Tristique nulla aliquet enim tortor at.

I. Comprehensiveness of the report

The comprehensiveness of the report is determined via the «Reporting Matters» analysis of the World Business Council for Sustainable Development (WBCSD). The analysis is based on three categories:

Principles

General concepts that should guide sustainability reporting.

Content

Information that the reporting material should contain.

Experience

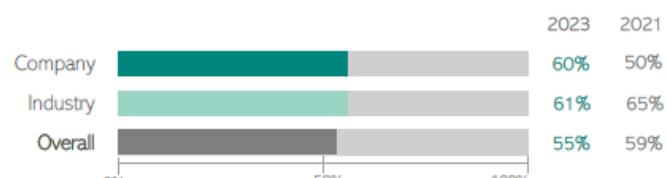

Elements that facilitate the readers access to and digestion of the reporting material.

Please note: The overall score between the «Reporting Matters» analysis of WBCSD and the «Comprehensiveness» analysis of Focused Reporting is not 100% identical. This is due to the fact, that the criteria «reliability» and «compelling design» are not assessed in the Swiss methodology to avoid any disadvantage for SMEs, who may not assure their report externally, and to avoid subjectivity of design preferences.

The company achieves the following result in the three categories:

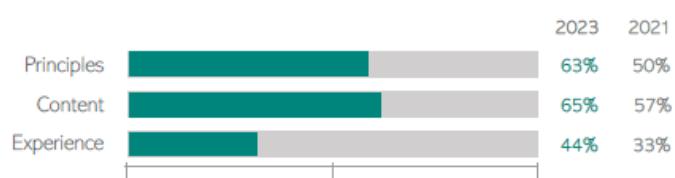

Core Results

The company complies with 60% of the requirements of the "Reporting Matters" framework.

Sub Results

There is potential for improvement particularly in the category "Experience".

The following chapters provide detailed information regarding the three categories.

III. Relevance of sustainability priorities

The relevance analysis checks whether the reporting material contains information on topics that have been identified as relevant for the company, industry, or the supply chain in which the company operates. The relevance analysis is carried out at the following three levels: company, industry, and international & supply chain level:

Company level

Topics identified using the [RepRisk ESG Risk Platform](#)

Industry level

Topics identified using the [Sustainability Accounting Standards Board \(SASB\)](#) [Materiality Map](#) and [RepRisk ESG Risk Platform](#)

International & supply chain level

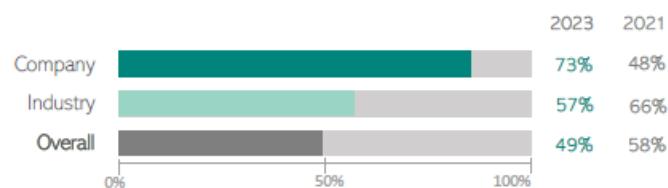

Topics identified with the help of the [WWF Biodiversity Risk Filter](#).

The company achieved the following results:

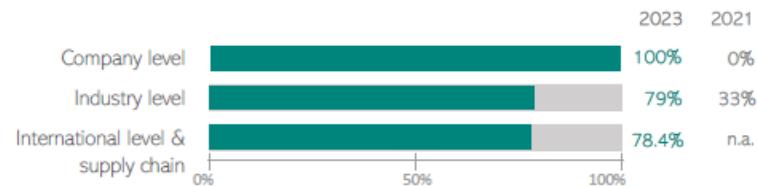

Core Results

The report covers 73% of the company's critical cases as well as the most relevant topics from industry and international & supply chain level.

Sub Results

Consider reporting about not addressed **international & supply chain level** issues.

More detailed information on the specific reporting at the three levels of relevance is provided in the following chapters.

3. International & supply chain level

The WWF Biodiversity Risk Filter is a tool developed to help companies and organisations assess and reduce the impacts of their activities on biodiversity. The tool allows users to conduct a biodiversity risk assessment based on specific criteria such as location, type of activity and potential impacts. In addition, the WWF Biodiversity Filter provides an overview of all direct impacts on and dependencies on biodiversity for different industrial sectors. The Focused Reporting relevance analysis is based on the globally identified biodiversity risks (impacts and dependencies) for the respective industries of the companies investigated.

IV. TCFD Readiness Assessment

The TCFD readiness assessment checks whether the reporting material contains information according to the disclosures recommended by the Task Force on Climate-related Financial Disclosures. The TCFD analysis is performed additionally to the Focused Reporting Benchmark and has no influence on the overall score.

The Taskforce on Climate-related Financial Disclosures gives recommendations on the following four areas:

Governance

The organization's governance around climate-related risks and opportunities.

Strategy

The actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning.

Risk Management

The processes used by the organization to identify, assess, and manage climate-related risks.

Metrics and Targets

The metrics and targets used to assess and manage relevant climate-related risks and opportunities.

The COMPANY XY report fulfils zero out of four recommended disclosures fully.

The company fulfils the recommended sub-disclosure of reporting on *Scope 1, Scope 2 and Scope 3*.

The company fulfils five out of eleven sub-disclosures partially namely reporting on *board oversight, management's role, processes for managing risks and targets*.

The other six sub-disclosures are not reported on.
